

Fracture Liaison Service

Certificate of Completion

Daniela G. Pal, P.A.

*has participated in the required activities needed to complete the
Fracture Liaison Service Certificate on*

May 15, 2016

A Fracture Liaison Service (FLS) is a coordinated model of care which aims to ensure that fracture risk assessment and treatment where appropriate is delivered to all patients with fragility fractures. An FLS, made up of a committed team of stakeholders, employs a dedicated coordinator to act as the link among the patient and the orthopaedic team, the osteoporosis and falls prevention services and the primary care provider.
